ORCID ID: https://orcid.org/0009-0003-1651-0590

An enthusiastic and driven medical student committed to advancing clinical expertise through continuous learning and practical experience. Deeply invested in research as a means to enhance patient care and contribute to the broader medical field. Described by employers as intuitive, inquisitive, focused, dedicated, and proactive.
Accepted to begin MBBS Medicine at Barts and The London School of Medicine and Dentistry, starting September 2024. Interested in Oncology, Endocrinology, and the developing field of personalized medicine.

Experience

Student/Undergraduate Researcher (Dec 2024 - Present)
William Harvey Research Institute - Charterhouse Square, London EC1M 6BQ

LinkedIn URL: www.linkedin.com/in/panagiotis-alexandros-drakos-664292244

Student researcher in Molecular Endocrinology Department under Dr. M. Korbonits.

Intern/Shadowing - Surgical Department B' (May 2022 - Jul 2025)

MHTEPA / Mitera Hospital - Full-Time — Athens, Attiki, Greece

▼ Overview

Since May 2022, I have returned annually to the Surgical Department B team at MITERA Hospital, completing 1–3 month shadowing and internship

▼ Overview

I am currently engaged in research focusing on the genetics of pituitary adenomas, with responsibilities that include the management and analysis of large datasets as well as the supervision of related research activities. This role continues to strengthen my skills in scientific investigation, data handling, and collaborative research practice.

placements each year. The department specializes in lower gastrointestinal surgery, and this experience provided extensive exposure to both laparoscopic and open procedures, including cholecystectomies, umbilical, inguinal, and incisional hernia repairs, as well as complex oncological operations such as resections of colorectal and gynecological cancers, cytoreductive surgery, and HIPEC treatments. I also observed and assisted in a wide range of additional procedures, including colectomies, gastrectomies, splenectomies, hysterectomies, ileostomies, colostomies, recto-vaginal fistula repairs, port-a-cath insertions, and minor surgeries such as lipoma, cyst, and nail removals.

Beyond operative exposure, I was involved in the broader management of surgical patients, including admission, diagnosis, prognosis, and post-operative care. I developed practical medical knowledge and skills such as suturing, familiarity with procedure-specific techniques, and an understanding of routine operating room practices. In addition, I enhanced non-

operative competencies, including interpreting medical imaging (MRI, X-ray, MRCP, ERCP), communicating effectively with patients and colleagues, and navigating the administrative aspects of hospital care. This comprehensive experience allowed me to gain meaningful insight into the technical, clinical, and interpersonal dimensions of surgical practice.

Cardiological Department Shadowing Assistant (Jul 2020 - Jul 2020)
LEFKOS STAVROS / The Athens Clinic - Internship

▼ Overview

I had the opportunity to shadow the Cardiology Department at Lefkos Stavros Private Hospital, where I gained valuable exposure to both the clinical and organizational aspects of patient care. My responsibilities involved closely observing the daily operations of the department, including the coordination of diagnostic and therapeutic services. I was also engaged in taking detailed patient histories and assisting in the performance of electrocardiograms under

Assistant Lab Technician / GP Assistant (Aug 2019 - Aug 2019)
German Embassy Pretoria Clinic - Internship @ Pretoria, South Africa

▼ Overview

I shadowed two general practitioners and a laboratory technician at the German Embassy Clinic in Pretoria, South Africa. Over the course of a three-week internship, I observed the daily operations of both the clinical and laboratory settings. My responsibilities included assisting with patient histories, participating in clinical examinations, and gaining practical exposure to blood collection and the handling of biological samples. I was also introduced to the use of

supervision. The majority of patients were referred for comprehensive pre-operative cardiovascular evaluations, while others attended for routine follow-up appointments and standard check-ups. This experience provided me with meaningful insight into the role of cardiology within a multidisciplinary healthcare team, as well as the importance of accuracy, efficiency, and communication in ensuring high-quality patient care.

laboratory analyzers and the workflow required to ensure accurate diagnostic results. This experience offered meaningful insight into the integration of primary care with laboratory diagnostics, and highlighted the importance of precision, collaboration, and professionalism in patient management.

Education

MBBS Medicine, Barts and The London School of Medicine and Dentistry (Sep 2024 - Jun 2029)

Activities and societies:

Year 1 Societies: Oncology, Surgical, BL Gastroenterology and BL Cypriot and Hellenic

BSc (Hons) Biomedical Science, Queen Mary University of London (Sep 2021 - May 2024)

- Grade: First Class
- Activities and societies: Member of Judo Society, Biomedical Society, QMUL Cypriot and Hellenic
- Grade A First Class Average all 3 years
- Dissertation: First Class 80%
